

About Meanderthals

The group was formed in 1993 after several seniors wishing to hike, but not alone, got together to hike in our amazing mountains. The initial members numbered 15, but over the years, the number has grown. In the 2024/2025 year (April 1 to March 31) there were 153 trips completed with 1,448 participants. As well as hiking, activities now include biking, cross country skiing, snowshoeing, and special interest trips for things like photography and birding.
